

durabond

Durabond cohesive bubble bonds easily to itself and not to the product being packaged. Reduces labor and inventory costs by replacing multiple pouch sizes with common slit and perforation options. Durabond can be formed into an airtight pouch resistant to moisture, water, dirt and grease, and is available in all bubble thicknesses. Durabond covers the entire product so it provides complete cushioning protection, eliminating damage. It is reusable, thus reducing material costs. Durabond makes airtight pouch leaving no exposed surfaces, protecting from dirt, grease and moisture.

KEY FEATURES

FEATURE	ADVANTAGE	BENEFIT
Covers entire product	Complete cushioning protection	Eliminates damage
Ease of Application - Sticks to itself	Reduced labor costs	Increased productivity
Tear & Puncture Resistance	Continual protection	No damage to product
No residue	No clean-up required	No additional labor cost
