

STARBOND

1/16" foam laminated to cohesive film
48" x 625' Part# COPAF060

Starbond cohesive foam bonds instantly to itself and not to the product. Starbond forms unusual and irregular shapes completely enveloping the product. Manufactured with polyethylene foam and cohesive film, Starbond can be reapplied many times.

COMMON END-USERS

- Wrapping of metal and wooden furniture
- Pouches on demand
- Fabricated metal products

FEATURES

BENEFITS

Cohesive film	Bonds to itself and not your product
Film based cohesive	No variability unlike sprayed or rolled on cohesive
Waterbased film	Safe for handling
Reusable	Can be used multiple times if kept clean of dust and dirt
Stocked product	Stocked in all Polyair plants in limited quantities for fast order turnaround

STARMASK

1/16" foam laminated to adhesive film
48" x 625' Part# ADPAF-060

Starmask adhesive foam sticks to the product providing a protective mask and peels off without leaving a residue. Manufactured with an adhesive film layer, Starmask is very strong and puncture resistant.

COMMON END-USERS

- Protection of electronic screens and sensitive parts during shipping
- Abrasion and shock resistance for glass and high sheen metal parts of appliances
- Spot protection for any product during shipping/handling

FEATURES

BENEFITS

Adhesive film	Adheres to almost all surfaces, including glass and metal
Very low residue	No residue for almost all applications
Waterbased film	Safe for handling
Reusable	Can be used multiple times if kept clean of dust and dirt
Stocked product	Stocked in all Polyair plants in limited quantities for fast order turnaround
